

## Boating Safety Policy

It is the policy of the Burnt Store Isles Boat Club, Inc., (the Club) that boating safety is a primary goal of the Club in the conduct of our boating activities. Toward meeting this goal, the Club encourages all boat captains in the Club to have completed a recognized boating safety course. In support of this goal the Club shall provide appropriate boating safety and training information and resources on [www.bsibc.com](http://www.bsibc.com), either in text form or by links to publically available boating safety information. Also, boating safety articles shall be included in our publication The Up-The-Creeker. The Club shall offer, or coordinate with approved training organizations for the presentation of approved boating safety courses recognized by the State of Florida for issuance of a Boater Safety Education ID Card. Finally, every captain shall be responsible for the safe operation of his or her vessel, the safety of the crew, and compliance with all applicable laws and regulations.
