

May 2014

## BSIBC Fishing Club Meeting May 13, 2014

Our attendance was down a bit (17) as might be expected since many part timers have headed to their northern domiciles.

Since it is peek tarpon time we did not have a guide (they need to be fishing not talking right now) *Topics* at the meeting revolved around catching bait and nets, what size is best for you, while we planned to do demo's the mosquitoes stopped that real quick. Nevin wanted me to mention that anyone wishing a little help with throwing a good spread is welcome to call and go by his house for a lesson. The other important item was the establishment of a Bulletin board for our members to communicate their wishes for a little harbor help. We have many well experienced fishermen ant they can be a big asset to newer residents in learning our harbor and fishing techniques in SW Florida. Doug Holmes is working to develop this mentoring part of our program and has already sent an email to members asking for their interest and comments. We already have a few good responses.

We have also asked how many would be interested in a group to Islamorada in the key for some Tuna and Mahi fishing?

Next and final meeting before summer break is June 10<sup>th</sup> Same place and Time.

Hope to see you there,

Capt.'s Doug & Nevin
